

GREENWAY HEALTH CASE STUDY

Restoring Trust & Driving Product Adoption in Healthcare IT

THE CHALLENGE

Greenway Health was facing serious customer churn. Delayed product updates, software frustrations, and shifting Health IT demands had eroded trust across its client base—just as the industry was leaning into transformation amid the pandemic.

THE STRATEGY

Greenwood Marketing Collective partnered with Greenway to launch the “Intergy Transformation Plan” - a full-scale, transparent initiative built around three pillars: **Rebuild Trust. Improve Experience. Lead Innovation.** A live Town Hall webinar drew over 800 attendees, directly addressing customer concerns and sharing the renewed product vision.

We followed up with a strategic go-to-market campaign that included drip emails, refreshed messaging, and updated sales enablement tools—all designed to reestablish confidence and clarity across customer touchpoints.

TACTICAL EXECUTION

To build trust at every touchpoint, we:

- Created a consistent communication cadence ahead of product releases
- Held feedback loops with internal teams to uncover customer pain points
- Launched the “Countdown to 100” campaign—a visual roadmap highlighting 100+ product enhancements, framed as a journey of listening and improvement

SERVICES PROVIDED

- Strategic Campaign Development
- Messaging Revamp
- GTM & Customer Engagement Strategy

THE RESULT

With clarity, creativity, and commitment to transparency, Greenway Health turned a reputational low point into a momentum-building moment. The renewed messaging helped drive up product adoption and restored critical customer relationships.

Curious how strategic marketing can reshape your reputation in healthcare?
